(57) **ABSTRACT**

Agents for oxidatively dyeing keratinous fibers include, in a cosmetic carrier, as an oxidation dye precursor of the developer type, at least one compound of formula (I) as set forth herein, in which R¹, R² can stand independently of each other, for a hydrogen atom, different substituted alkyl groups, and/or different substituted acrylic groups, and Y stands for a hydroxyl group, an amino group, or a C₁-C₆ alkylamino group, with the proviso that at least one of the moieties from the group R¹ and R² does not stand for a hydrogen atom, and/or the physiologically compatible salt thereof.
